OBJECTIVE

Motivated and detail-oriented BCA student with a strong foundation in programming, data structures, and software development. Eager to apply technical skills and academic knowledge in a dynamic environment to build innovative solutions and contribute to organizational growth while enhancing my professional skills.

EDUCATION

• Institute of Technology and Management (ITM, GIDA) BCA (Bachelor of Computer Application)	2024 – 2027	7.82 CGPA
• Aatmdeep Vidyalaya Senior Secondary Education (12th)	2023	72%
• H.P. Children's Academy High School (10th)	2021	86%

SKILLS SUMMARY

</> Languages

C, C++, Java, Python,
JavaScript, HTML,
CSS, SQL, PHP

📦 Frameworks / Libraries

Flask, TensorFlow,
OpenCV, Pandas,
NumPy, Scikit-learn,
Librosa, Bootstrap

🔧 Tools

VS Code, Git, GitHub,
MySQL, Jupyter
Notebook

📊 Domains

AI/ML, Data Analytics,
Web Development

EXPERIENCE

Frontend Developer - Obtains Technology

August 2026 - Present

- Developing responsive front-end interfaces and improving website UI/UX.
- Working with HTML, CSS, JavaScript and Bootstrap for modern web pages.

Artificial Intelligence Intern - Codec Technologies

20 July, 2026 - 20 August, 2026

- Worked on AI/ML projects using Python and related libraries.
- Implemented and tested machine learning models to solve real-world problems.

Frontend Developer Intern - Code Alpha

15 June, 2026 - 15 July, 2026

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Collaborated with the team to improve UI/UX and cross-browser compatibility.

Big Data - Samsung Innovation Campus

11 August, 2025 - 15 October, 2025

- Worked on big data processing and analytics using Python and related tools.
- Analyzed large datasets to extract meaningful insights and generate reports.

PROJECTS

① Deepfake Face and Speech Detection

- Developed an AI-based system to detect manipulated face images and synthetic speech using deep learning.
- Implemented image preprocessing, feature extraction, and audio analysis for improved detection accuracy.
- Technologies: Python, OpenCV, TensorFlow/Keras, Librosa, Machine Learning algorithms.

② Health Report Analyzer

- Designed an AI-powered application that analyzes medical reports and provides health insights automatically.
- Applied OCR and Natural Language Processing (NLP) to extract information from laboratory reports.
- Generated easy-to-understand summaries, highlighted abnormal values, and suggested preventive measures.
- Technologies: Python, Flask, Pandas, OCR (Tesseract), NLP, HTML, CSS, JavaScript.

③ Responsive Image Gallery

- Designed a fully responsive image gallery using HTML, CSS, and JavaScript.
- Implemented grid layouts, hover effects, image filtering, and lightbox view.
- Optimized performance for different screen sizes and browsers.

④ Smart Learning and Campus Management System

- Developed a web-based system to manage academic activities for students, teachers, and administrators.
- Features: Student/Teacher login, attendance management, assignment submission, notes sharing, results, notifications, and admin dashboard.
- Technologies: HTML, CSS, JavaScript, Python (Flask), MySQL.

CERTIFICATIONS

- Python for Everybody – Coursera
- Data Science with AI – Internshala
- Big Data – Samsung Innovation Campus
- AI & ML – Samsung Innovation Campus

ACHIEVEMENTS & ACTIVITIES

- ✓ Participated in various coding competitions and technical events.

- ✓ Volunteered for technical workshops and college events.

- ✓ Passionate about learning new technologies and building real-world projects.

SOFT SKILLS

- Excellent Communication
- Teamwork & Collaboration
- Problem-Solving
- Critical Thinking
- Time Management

- Leadership
- Adaptability
- Quick Learner
- Analytical Thinking
- Attention to Detail

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.

Date: 15 May, 2026

(Priyanshi Srivastava)
